—The newspaper man is blamed for a whole lot of things he can't help, such as using partiality in mentioning visitors, giving news about some folk and leaving others out, etc. He simply prints all the news he can find. Some people inform him about such things and others do not. An editor should not be expected to know the names and residences of all your uncles, aunts and cousins even if he should see them get on or off the train. Tell us about it. It's news that makes a newspaper, and every man, woman and child can be associate editor if they only will.
